

## LABOR REPORTING DATA SHEET *PROGRESSIVE AVIATION*

The *Progressive Aviation* Labor Reporting Module was designed to allow your company to track and maximize employee productivity. Fully interfaced to the Work Order Module, you can be sure that all billable labor is reported and charged to the appropriate job.

Additional benefits of the Labor Reporting Module are:

- Automatically allocates and tracks each employees time to specific work orders and tasks. Helps maximize productivity and allocate employees time efficiently. You can be sure that all billable labor is reported and charged to the appropriate job. All time applied to a job is automatically accounted for in the Work Order Module.
- Fast and easy time entry screen. Operator can enter an employee's time card quickly and the information automatically flows to the customer, job and employee records. Eliminates double and triple work.
- Tracks both regular and overtime hours. Tracks rates by employee and tasks.
- Allows your company to track non-productive and write-off time. By determining and tracking where these nonproductive times occur, your company can take steps to eliminate the time wasters and become more productive and profitable.
- Full on-line history for customers, employees, jobs, and tasks allows you to plan ahead by viewing past trends.
- Allows the user to enter text for each entry. Gives you the level of detail your company needs.
- Labor matrix for determination of cost and general ledger category.
- Inquiry by Job, Employee and Customer allowing you to see where your labor resources are being utilized.
- Optional electronic labor collection interface to the system of your choice.
- Optional payroll interface if use manual labor collection or bar coding for entry into labor reporting
